EDUCATION

B.Tech Computer Science & Engineering — Techno India University	2023 – 2027
CGPA: 8.52 / 10.0 (5 Sems) Latest SGPA: 8.6 (Sem 5) Coursework: DSA, DBMS, OS, Computer Networks	
Senior Secondary (XII), CBSE (Science) — Techno India Group Public School, Chuchura	2023
Secondary (X), CBSE — Sri Chaitanya Techno School, Visakhapatnam	2021

WORK EXPERIENCE

AI Full Stack Intern Better Best Software Solutions Kharagpur, West Bengal (Remote)	Apr 2026 – Present
- Designed and developed AI-driven full-stack applications in collaboration with the core AI team; built and optimized backend systems using Python, FastAPI, LangChain, and LangGraph for LLM-powered workflows. - Integrated LLMs (OpenAI, Anthropic, Gemini) into intelligent applications, chatbots, and automation systems; engineered vector and graph database pipelines using FAISS, ChromaDB, and Neo4j for semantic search and relationship mapping. - Built responsive, scalable frontend interfaces using React and Next.js; connected frontend to backend APIs and AI services; managed application data and AI interaction logs using MySQL. - Contributed to prompt engineering and model performance optimization; participated in daily stand-ups, brainstorming sessions, and agile technical discussions.	

TECHNICAL PROJECTS

FinTrack – Personal Finance Manager Next.js 16, React 19, TypeScript, Drizzle ORM, Neon PostgreSQL, Clerk Auth, Tailwind CSS, Recharts	May 2026
- Built a full-stack finance app with budget CRUD (emoji icons, spending limits), per-category expense tracking, and real-time over-budget toast warnings; used Drizzle ORM with Neon serverless PostgreSQL for type-safe, scalable data access. - Implemented Clerk authentication (email + social login, protected routes) and an interactive Recharts dashboard with animated stat cards showing real-time total budget, total spend, and remaining balance across all categories.	
AI Interviewer Agent FastAPI, FastMCP, React, Vite, Google Gemini, JWT	March 2026 – Present
- Built an AI interview simulation platform that parses uploaded resumes via Google Gemini to generate 5–8 adaptive, role-specific questions; evaluates each answer in real time with scores (1–10), strengths, and improvement feedback. - Exposed backend services via Model Context Protocol (MCP) for agent consumption; delivered final performance reports with overall score, label, and personalized tips — secured with JWT-based session authentication.	
EzST-AI – B2B Invoice Tracking & GST Compliance FastAPI, React, Neo4j, LangChain, FAISS, Supabase, Gemini	Apr 2026 – Present
Contributed to an AI-powered B2B invoice system with a multi-agent pipeline (ValidatorAgent, GSTAgent, RiskAgent) for GST automation (GSTR-1, GSTR-3B), RAG-based Q&A, and LLM-driven fraud detection via Neo4j graph queries.	
Task Management System – Full Stack Node.js, Express.js, MongoDB, React.js, JWT, bcrypt	Feb 2026 – Present
Built a secure full-stack task manager with JWT authentication, role-based access control (User & Admin), CRUD with priority filtering and due date tracking; applied security best practices: bcrypt hashing, Helmet headers, rate limiting, and input validation.	

TECHNICAL SKILLS

Languages:	Python, JavaScript, TypeScript, Java, C++, SQL
Frontend:	React.js, Next.js, HTML5, CSS3, Tailwind CSS, shadcn/ui, Recharts
Backend:	Node.js, Express.js, FastAPI, NestJS, Drizzle ORM, REST APIs
AI / ML:	LangChain, LangGraph, RAG Pipelines, Prompt Engineering, NLP, Machine Learning, Deep Learning
Databases:	MongoDB, PostgreSQL (Neon), MySQL, Neo4j, Supabase, FAISS
Tools:	GitHub, Docker, Clerk, Postman, Jupyter, Streamlit, GitHub Copilot, Cursor
Concepts:	DSA, System Design, JWT Auth, Agile, CI/CD, OOP, DBMS

ACHIEVEMENTS & CERTIFICATIONS

- Winner — Plot2Deploy Hackathon (GDSC TIU) | Runner up— Hack Horizon 2.0 (GDG Arka Jain University, Jharkhand)
- IBM: Deep Learning with TensorFlow, Machine Learning with Python, Prompt Engineering for Everyone (2025) | Microsoft: Python Cloud Skills Challenge (2023)
